VBS creative set "Spool of thread gnome"

Instructions No. 1992

Difficulty: Beginner

Working time: 1 hour 30 Minutes

These cheerful gnomes can hardly wait to be designed by you and then arranged in your home. With our practical **VBS Creative set "Garnrollen-Wichtel"** and a helpful template, you can do this in no time at all. In addition to the set, you will also need hot only glue, Fineliners, Marker in different colours and a pair of scissors.

Thus the gnomes are created:

Halve the length of the **linen ribbons** so that you have two strands per colour. Cut a 6 cm long piece from each Linen ribbon of them, from which the cap is **formed**. Take the **pattern** to hand. Place the piece in front Jute ribbon of you and fold the corners as shown in the pattern to form a triangle. Where the sides of the tape meet, glue must be applied. Cut off the excess pieces

The **Wooden balls** are **glued** to the thread reel with some **hot glue**. Around each yarn roll a piece from **Linen ribbon** loosely wrapped around. First fix the beginning with hot glue, then wrap and fix the end again with glue

The hair of the gnomes is cut from **jute cords** and attached **to the** head with **hot glue**. Combine the lightest colour with the brown and grey Ribbon. Put on the cap and fix it with some glue. In the same colour combination as the hair with the jute cords, a belt with a double knot is wrapped around the bobbins

Then paint the faces with **markers** and **fineliners**. You can use our template to help you.
