Anleitung für einen Osterkranz im zarten Rosa

Instructions No. 1296

With only **little effort**, you can very quickly design this delicate Easter wreath yourself. The **instructions** will help you to make it yourself.

Here's how it works

To make the Easter wreath you need a natural wreath as a basis **.** Lace ribbon, Blossoms, buttons and a cherry tree branch are the matching decorative accessories.

At first, wrap narrow **Lace ribbon** around the wreath. The beginning and end of the decorative tape is fixed with hot glue. Arrange small buttons and flowers as accessories on the wreath and glue them with hot glue.

With a **cherry blossom branch,** a bow made of wide Lace ribbon and a particularly large flower, a visual highlight is set at the bottom of the wreath with the help of the hot glue gun.

The special eye-catcher with this decoration idea is the **VBS cock "Hanno auf Glocke".** This is finally fixed on top of the wreath.

Now only still provide the wreath with a suspension belt - finished.
