Advent wreath made from round beech sticks

Instructions No. 2647

Difficulty: Challenging

Working time: 10 Hours

An Advent wreath is a must during the Advent season. These are becoming more and more different, whether with fir trees, dried flowers or, in this case, round beech sticks. Create a modern Advent wreath with the help of these instructions.

This is how the Advent wreath is created:

First, saw the round beech sticks into pieces approx. 4 to 9 cm long. Then sand the ends round.

Next, glue the sticks together with Ponal to form a circle. You can use metal rings in different sizes as aids. Allow everything to dry thoroughly. Then you can put the candle holders into the wreath. You can fix them with hot glue for a better hold.

Finally, write on the eucalyptus leaves with the Posca marker. Wrap the sisal cord around the bottom edge of the candle and insert the labelled eucalyptus leaf into each one. As a final touch, you can stick individual stems of Lagurus into the wreath.

IMPORTANT: NEVER leave candles burning unattended!

Must Have

Craft pack wood "Round bars"

Number of parts: 99
Material: Wood

29,99 €
