Anleitung: Bastelltechnik Strohseide

Instructions No. 1247

Tinkering with Straw silk paper has always been one of the most popular Craft techniques. When tinkering with Straw silk paper you can tear or cut it into pieces or apply it as a full motif to an object of your choice. For this purpose this brush and decoupage-glue as an aid. The beautiful Straw silk paper-motifs turn every object into an individual highlight in no time.

And this is how the crafting works with Straw silk paper:

Which handicraft material do I need for the handicraft technique "Straw silk paper"?
For this handicraft technique you need a motif straw silk of your choice, an object to be glued, preferably a napkin brush, silhouette scissors, as well as decoupage glue & varnish.

How exactly does the handicraft technique "Straw silk paper" work?

First of all, you should make sure that the object to be pasted is primed as light as possible in order to maintain the colour intensity of the fine Straw silk paper .

The next step is to select the section or motif of Straw silk paper that you want to apply and cut it out carefully. If the background color is adjusted, a tearing can be advantageous to let the contours of the Straw silk paper melt better with the background.

Next, place the motif in the desired position and apply the decoupage adhesive, always from the inside out (!), using a soft brush.

After the adhesive has dried, you can apply a layer of Decoupage varnish for extra protection and let it dry thoroughly again.

In order to apply particularly filigree motifs, which could possibly tear, it is recommended to use a spray adhesive!
