Bag design with textile painters and rivets

Instructions No. 579

Difficulty: Advanced

One Mrs. can never have enough pockets. With the big shopper with the trendy leopard pattern you will become a bag designerStone-Applicator yourself with fabric painting pens and the practical rhinestone. The matching spectacle case is created almost incidentally.

And so it goes

Bag design

Place a firm cardboard in the bag so that the paint cannot press through to the back.
First mark the stripes in the middle of the bag with a long ruler and a dash ex-pen, then draw the leopard pattern

with the dash ex-pen. Now paint the marked areas with the different textile painters.

After drying, the cardboard is removed. Put permanent iron-on foil on the bag and fix the colours at cotton temperature for about 5 minutes without steam with an iron. Position the rivets on the bag in the desired places, heat the strassStone-Applicator and fix the rivets with it. Finally use double-sided adhesive tape to stick the imitation leather tape onto the strips.

Spectacle case made of light fabric

Make a Stencil from the template and transfer it to the glasses case with the line-ex pen. Protect the lower side of the spectacle case from paint by placing firm cardboard in the case. Design the bill case with Textile Painter and fix the colours with the iron after drying. Decorate the case with rivets using the Strass-Stone-applicator.
