Beutel batiken

Instructions No. 1602

Difficulty: Advanced

Working time: 2 Hours

Create a **trendy bag** with the **batik technique**. With the **tying technique** , new beautiful batik patterns are always created **.**

Batiks

Bring **1 litre of water to the boil** and let it cool down a little. In a large container, mix the ingredients as **described** in the package instructions **Batik paint**. In our example we have used the **Javana Batik-Textile paint „Cool Blue"** .

Tie or knot the cotton bag in the style you want. You can use a string, cable ties or similar or knot the bag in the desired place. It is important that you **tie up** the places **firmly.** At these points the bag will **now take little or no colour** and the **typical beautiful patterns on** the dyed fabric will appear

Dip the **laced bag** into the paint bucket **as far** as it should take on paint. Use **clothes pegs** to **fix** the bag **to the** edge of your bucket. After 1 hour the bag can be removed from the bucket. Then **rinse** the excess paint from the still-bound bag under warm **water.** Rinse it out until the water remains clear

Now you can **loosen the knot or remove the ties and** rinse your bag again. Now hang the bag up to **dry**

Stenciling

Iron the dried bag to get an optimal result at Stenciling . Place a piece of cardboard or thick foil in the bag to **protect** the paint from being pressed through.

Now place your desired **Stencil** centered on the bag. As a **tip** , we recommend that you first check Stencil with **temporary Spray glue** to spray so that it cannot slip at

Stenciling

With the **Sponge brushes** and with **textile Ink Pads** the bag can now be printed. After applying the ink, allow to dry for approx. 10 minutes and then iron in the wool setting for approx. 3 minutes using slightly circular movements .

Tip: If you want to **dye** with **more than one colour**, **first** batik **the** lightest **colour and** then dye with the darker colours further. To do this, **loosen** some or all of the ties **between them and, if necessary,** set them again.

Have fun trying it out!
