Bouquet of flowers from chenille wire

Instructions No. 3194

Difficulty: Beginner

Working time: 2 Hours 30 Minutes

Colorful flowers from chenille wire

Bring a breath of fresh air and joy into any room with a self-designed bouquet of **colorful chenille wire** flowers!

Flower magic with chenille wire!

Step 1: From chenille wire to the flower

To create the unique flowers for your bouquet, you will need 1 **chenille wire** per flower.
Shape the wire into 6 even spikes and glue the ends together with the **hot glue gun**. Now bend the individual **petals** slightly upwards to shape them.

Next, take the **light brown chenille wires** and cut them into 5 pieces of equal length.
Roll the wires like a snail and glue them in the middle of the flowers.
Now fix the **chenille wires** to the back of the flowers with hot glue.
To embellish the whole thing, glue a piece of green chenille wire around the stem to hide the glue dot.

Step 2: Tie the bouquet

Take a bow **kraft paper** and lay it crosswise on the table.

Now fold the **bottom left corner** backwards and pass it approx. 3 cm over the **bottom right corner** so that the corners overlap in an offset manner. Fold the bottom half of the resulting fold towards the middle and leave the top half rolled up.

To make tying the bouquet easier, tie the **flower stems** together at different heights.
Next, place the bouquet on the Paper at the crease and fold it over the stems.
The right side of the paper is folded like an accordion and finally tied together with the **satin ribbon** tied together.

For the finishing touch, you can trim the ends of the flower stems that are too long to one length.

Now let the world admire your floristry skills!
