Bright garland with macramé feathers

Instructions No. 2076

Difficulty: Advanced

Working time: 1 hour

No matter whether one is addicted to the Boho style, simply Macramé likes it or wants only a decoration for e.g. the bedroom. A garland with Macramé-Feathers is timelessly beautiful and a great eye-catcher, which depending on the material used is also very versatile.

1. **Ribbon prepare**

First, cut off a sufficiently long piece, Ribbon lay it twice and make a knot at one end to form a loop. Then cut a piece of cardboard to your liking, which will be about the same width as yours. Therefore you wind your Yarn wool many times. How often depends on how thick your material is and how luxurious you Feathers want it to be.

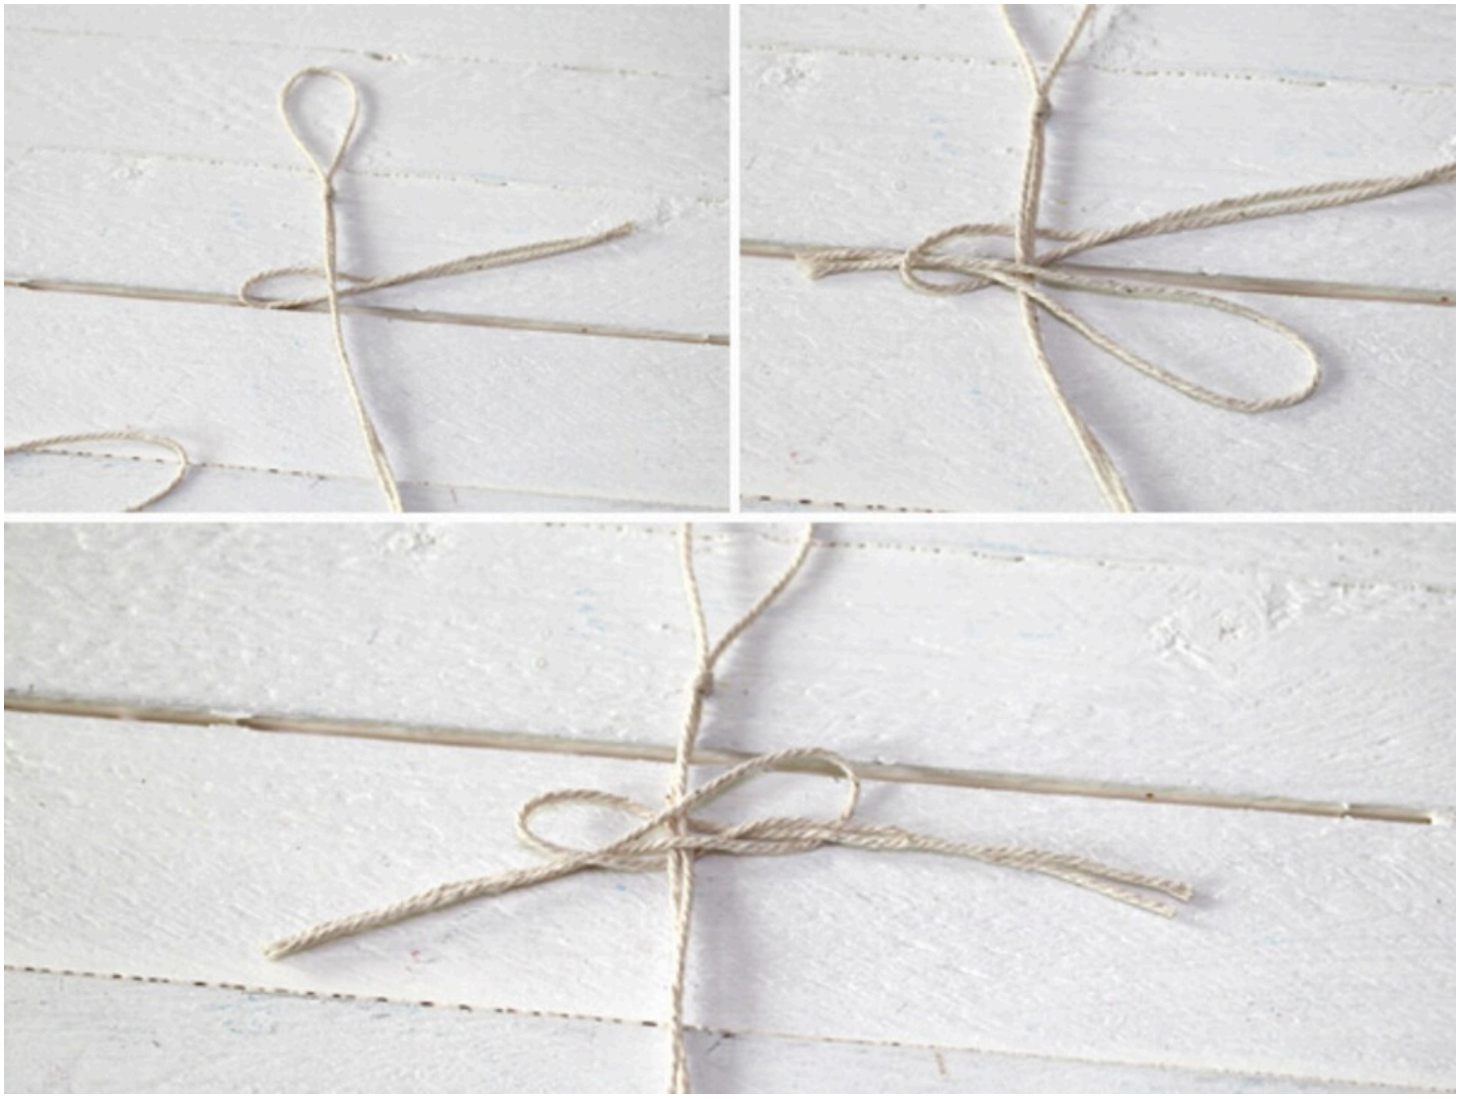

When you've wound enough, cut it Yarn on one (!) side. If you find out later that yours Yarn is not enough, you can do more work this way.

2. **Feathers knot**

Now place your individual yarn sections once above and once below the long thread. The end pieces are always placed under the loop of the other section.

Then tighten the ends loosely, push the first knot up to the knot and tighten it properly. In this way, you can tie up sections of yarn until you have reached the desired size or mass

You can let the loops of the section below always point in one direction or alternately tie them. That means sometimes the lower loop is on the left (and top right) and sometimes it is on the right (and top left).

So you can also vary the bridge in the middle

Depending on the material used, you can create a wide variety of individual pieces, Feathers and the number of sections you need will also vary

If you then use different colours or combine different yarns and wool, you can create numerous individual Feathers ones.

3. **Feathers comb and cut into shape**
When yours Feathers are finished, comb them out. Depending on the material, different tools are always better suited. Do this until the individual yarn sections are no longer twisted and fall loosely and fluffy. When combing you should always start at the end and then slowly work your way to the middle. That way you will prevent the individual threads from knotting too tightly

If the threads do not come loose as desired, e.g. with a comb, then use a needle with a round tip to loosen the cord pieces

Then you can cut yours into Feathers the desired shape.

4. **Putting the garland together**
If you have finished enough Feathers , you can now attach them to the branch. Either directly on it, with an extra piece on Ribbon, the eyelets or a combination of all of these

For my variant, they are Feathers partly threaded Warp yarn on one piece and partly knotted tightly. Wrap this around the branch and fix it Yarn to the outer eyelets.

Last but not least you arrange the lights on the feather garland and you only need to find a nice corner for your new light decoration

Have fun doing it!

Must Have

Branch with eyelets, L 40 cm

Length: 40 cm
Material: Wood

2,59 €
