building kit Designing houses and fir trees

Instructions No. 2868

Difficulty: Beginner

Working time: 3 Hours

Let the **houses** shine. With the effect of the **star foil** behind the windows and a chain of lights, you will achieve a beautiful result. The ready-decorated building kit looks great on the windowsill or in your Christmas decorations combined with other beautiful DIY projects.

How to design the building kit:

Paint the **VBS woodenbuilding kit** "Houses and fir trees" in your favorite colors. Our **VBS handicraft paint set** and our craft paints in your VBS Craft paints in the colors of your choice achieve an excellent result.

Once dry, cut the **star foil** to size and stick it behind the houses. Use hot glue to stick the chain of light to the back of the insert motif. **Tip:** The further a light is away from the foil, the bigger the star effect.
