Butterflies with lace

Instructions No. 830

Here's how it works:

Apply this **Handicraft glueto the butterflies** and stick them **flat on the tip.** When the glue has dried well, cut **back** any excess material with sharp silhouette scissors.
Paint the flowers in the middle with old pink Handicraft paint and lighten them more and more with white on the outside. Shade the remaining contours with a mixture of moss green and white

Finally, fix the half pearls in the middle of the flowers with flash glue gel.

Filigree lace is the perfect material for the two large wooden butterflies. The colour scheme is deliberately kept discreet.

Extra tip
The filigree wooden butterflies come with adhesive dots. With these I can decorate them very fast and easy on the wall.
