Candles with flowers & leaves

Instructions No. 2515

Difficulty: Beginner

Working time: 1 hour

The flickering light of **candles** exudes a **beautiful light** and a **cosiness** that cannot be created with artificial lights. Candles decorated with flowers look particularly pretty. Such a homemade candle is a **wonderful gift** for friends, relatives or acquaintances whom you would like to give a little pleasure.

This is how the beautiful candles are designed:

Place **flowers** on the **candle surface** and stretch **baking paper** tightly over them. Gently warm the surface with the embossing hairdryer. As soon as you see that the wax is liquefying on the surface, switch off the hairdryer. After a short moment, carefully peel off the baking paper. The flower has now "sunk" into the top layer of wax.

Write on the smooth (important!) side of the **tissue paper** and apply it to the candle in the same way, also covered

with baking paper.

Cut a strip from the **kraft paper** and stick it around the candles as a **banderole**. Decorate with tag and ribbon.

Important: Never leave a candle burning unattended.
