christmas crib Crafting with Bark

Instructions No. 4161

Difficulty: Beginner

Working time: 40 Minutes

With " nativity figures ," you can create an atmospheric " christmas decoration " with rustic charm in no time at all. A small nativity scene takes shape on wood and bark, creating a festive atmosphere whether placed on a windowsill, sideboard, or used as a table decoration. The nativity scene tinkering is ideal for beginners and can be easily adapted to your personal style. This turns a simple craft idea into a personal touch for the Advent season.

1) Preparation

Have all your materials within reach so you can work more easily. Turn on the hot glue gun and let it warm up until the glue is completely liquid.

2) Make a " christmas crib "

Cut the tree bark to the desired length using large scissors and glue the ends together with a hot glue gun to form a point. Now use the hot glue gun to attach the "roof" made of tree bark to the bark disc to create a rustic " christmas crib ."

3) Decorating the " christmas crib "

Glue some of the " nativity figures " stuffing onto the tree bark disc as " straw ." You can either place the figures loosely inside the " christmas crib " so you can rearrange them to your liking, or glue them in place with a bit of hot glue for a more secure hold.

Now it's your turn! If you're looking for more ideas about the " nativity scene tinkering " and matching craft supplies, check out our online store and put together your next Christmas nativity scene in your own unique style.
