Christmas Explosion Box

Instructions No. 2362

Difficulty: Beginner

Working time: 6 Hours

Surprise! This gift box opens like an explosion and unfolds various compartments and layers. The Kraft Paper Explosion Box is a wonderful gift idea for Christmas. In this tutorial, we will give you inspiration on how to create the box for Christmas.

The kraft paper explosion box comes with lots of little extras. The box contains 12 solid pockets, a small box that fits exactly in the middle and 12 decorative elements in different shapes and sizes.

In our decoration example, we chose different papers from the scrapbook block, cut them to size and stuck them to the individual parts of the explosion box using craft glue and 3D adhesive pads.

Other small decorative elements are lace ribbon, decorative ribbon and half pearls. These are also glued on as decorations with a little craft glue.

The two decorated fir trees that decorate the middle of the box are a special eye-catcher. To do this, cut off the feet of the fir trees with a side cutter. Glue individual Glixia flowers to the trees and finally decorate them with Rocailles threaded on wire.

The exploded box makes a wonderful gift because it also offers space for lovely messages, personal photos, some money or a voucher.
