Christmas tray with wooden-building kit

Instructions No. 4103

Difficulty: Beginner

Working time: 2 Hours

Using a wooden-building kit, a tray, and some decorative snow , you can create a festive winter scene. Perfect for beginners who want a decorative arrangement for a sideboard, windowsill, or table.

1) Preparation

Put on disposable gloves and lay out your materials.

2) Form snowballs from “ polystyrene balls ”

Put some decorative snow in your hand and roll the polystyrene ball in it so that the snow sticks well to the ball. The disposable gloves prevent the decorative snow from sticking to your hands. Repeat this step for each polystyrene ball.

3) Let the balls dry

Insert the bamboo skewers with the balls into the drying foam and let them dry completely.

4) Decorate the tray and moose

Now paint the moose and the tray as desired and let the paint dry. Place the moose on the flat wooden board and dab the transition from the board to the moose with decorative snow to create a wintry look and hide the edge where the moose is attached. Additionally, the " decorative snow " provides a better hold once it's dry.

5) Arrange the Winter Landscape on the Tray

Fill the tray with the "Diamant-Schnee" until a thick layer of snow forms. Then place the " building kit " on the tray and add the " polystyrene balls " as snowballs.

Now it's your turn! In our shop, you'll find more winter-themed ideas, " decorative snow ," and many different floral arrangements!

Must Have

VBS Wooden plug-in motif "Reindeer"

Number of parts: 5
Length: 30 cm
Width: 4 cm
