Christmas wreath with house decoration

Instructions No. 2871

Difficulty: Beginner

Working time: 2 Hours

Want to bring the festive magic of Christmas into your home? We have a simple tutorial for you on how to make your own Christmas wreath with houses.

Design your own Christmas wreath

First, paint all scatter decoration with houses and stars in the colors of your choice. In our example, we have used classic Christmas colors.

We hung the large stars together with the bells and the small stars in the middle of the wreath with a nylon thread as decoration. This gives the wreath a completely new look. At the top of the wreath, where the nylon thread is attached, the printed ribbon is now tied with a pretty bow. The length of the ribbon can be chosen as desired.

Finally, the houses and stars are glued onto and into the wreath with a little hot glue. We opted for an alternating and even pattern for the stars. We arranged the houses at the bottom of the wreath to create a small row of houses.

The decorative wreath is ready and the Christmas season can begin.
