Colourful school cone

Instructions No. 2556

Difficulty: Beginner

Working time: 1 hour 30 Minutes

The most beautiful school cones are self-made! The first day of school is a special moment for the new schoolchild. A self-made school cone rounds it all off and makes the day an unforgettable moment.
In this tutorial, we will show you how to create a colourful school cone with names in just a few simple steps.

Design a school cone with dots

Use the stencil set and a pencil to draw your child's name on the school cone blank.

Use Karin PIGMENT Decobrush markers to colour the name. It is best to choose the child's favourite colour.

After drying, you can decorate the letters with little flowers with the markers as desired. To do this, simply press the tip of the brush onto the paper at a slight angle to create a drop shape. Place a few in a circle so that a flower is created.

Now decorate the school cone cut-out with the colourful stickers.

Glue a sheet of the straw silk to the top edge of the school cone from the inside. Use a little craft glue for this.

Fold the school cone blank in the already folded areas, put some craft glue on the edges and pin the school cone together. Leave to dry.

Shorten the straw silk if necessary. Now the school cone can be filled with great things like pencils, ink box,

ruler, eraser, notebooks and little treats. Close the school bag with satin ribbon.
