Design a wooden Christmas tree

Instructions No. 3526

Difficulty: Beginner

Working time: 1 hour

The Christmas season is the perfect opportunity to make your own creative decorations for your home. Our step-by-step guide will help you to create a beautiful, hand-painted wooden Christmas tree that shines with an elegant chain of light and charming miniature scenes. Be inspired by the Christmas atmosphere and create your own personal work of festive art.

Step 1:

Start your creative project by painting the inner part of your wooden Christmas tree with the golden **VBS handicraft paint** paint. This color gives your tree a festive shimmer and serves as the perfect base for your decorations. Allow the paint to dry thoroughly before continuing with the next steps.

Step 2:

While the golden paint dries, you can get to work on creating one of the house silhouettes. Use the antique white paint for this **handicraft paint**. This color creates a nice contrast to the golden base of the tree and gives your decoration a cozy winter atmosphere. Make sure to apply the paint evenly and cover the silhouette completely. Wait until all parts have dried well to make sure there are no smudged areas.

Step 3:

Once all the painted parts are completely dry, it's time to add a warm glow to the wooden Christmas tree by attaching a chain of light . Use hot glue to attach the chain of light to the back of the wooden tree.

Step 4:

To complete the project, attach the miniature fir trees and painted house silhouette to the inside of the wooden Christmas tree. Place the fir trees so that they create a harmonious overall picture and fix everything in place with some hot glue. Make sure that you glue the scenes firmly enough so that they remain stable. Allow the entire construction to harden well to ensure that nothing slips.

Visit our online store and discover all the necessary materials, from VBS-Craft paints, miniature fir trees, chains of lights and more! Create your individual Christmas decorations now.
