Design concrete bowl with octopus

Instructions No. 1889

Difficulty: Advanced

Working time: 2 Hours

This octopus does not only look great, it is also a practical little helper - it watches over your jewellery and keeps it ready for you.

First grease the **casting mould with Release agent spray** one. This makes it easier for you to remove the casting from later. Mix about **10 tablespoons of concrete with** water to a creamy mixture. Pour this into the **large mould, press** the small mould into the top and weigh everything down with a heavy object, such as a "Let the concrete Stone. set for 24 hours". Carefully remove the bowl from the mould. Grind the edges of the shell with **Sandpaper**

Then you model an octopus on the shell from the ready-to-use concrete **accordingModelling clay to** your ideas. Let it dry for 24 **hours**. Lift the modelled octopus carefully, paint it in **Orange Gold** and let everything dry thoroughly. Then fix the octopus **to** the shell with **assembly glue**

For the stones mix about 10 **tablespoons of concrete with** water until a creamy mass is created and fill the mass into the mould. Let the concrete dry for **24 hours** and then carefully remove the castings from the mould. Now the stones can be designed with **colours** as desired.

Must Have

Concrete for creatives, 5 kg

Weight: 5 kg

25,99 € (1 kg = 5,20 €)
