Creative Christmas decorations with wooden plug-in motifs - Your DIY-Instructions

Painting the wooden stick motifs

First, paint the wooden stick motifs with the craft paints of your choice. Use Christmassy colors such as red, green, gold or silver, to create a festive atmosphere. If necessary, draw on the eyes with a permanent marker to give the

stick-on motifs additional liveliness. Make sure that the colors dry well before moving on to the next step.

Apply decorative snow

Once the paints have dried, apply decorative snow to the painted wooden stick motifs. This gives your motifs a wintry touch and makes them look as if they have just arrived in a winter wonderland. Use the decorative snow liner to achieve a decorative, realistic look.

Prepare the bark slice

The bark slice is also provided with decorative snow to perfectly round off your winter landscape. The bark slice gives your decoration a natural look that goes wonderfully with the wooden stick-on motifs.

Insert the motifs into the holes

Now insert the painted and snow-covered wooden stick motifs into the prepared holes and fix them in place with a little handicraft glue or a hot glue gun. Make sure that everything is stable and does not wobble.

Arrangement on the wooden decorative panel

Next, place the winter arrangement on the wooden decorative panel. Arrange the stick-on motifs, flowers, cones and decorations so that everything looks harmonious and stylish. You can also use glue, such as hot glue, to fix the individual elements in place and ensure that nothing slips.

Your do-it-yourself winter wonderland

After these simple steps, you will have created a beautiful Christmas decoration that is guaranteed to draw admiration. Whether as a table decoration, window decoration or gift - this winter craft idea is guaranteed to bring a festive atmosphere to any home.
