## DIY twisted Candles

**Instructions No. 2335** 

Difficulty: Beginner

Working time: 2 Hours

These candles have turned our heads! Twisted candles are currently very trendy and an absolute must-have for home decoration. Learn in this tutorial how easy it is to twist candles yourself and bring the decoration trend into your home.

## Twisted candles:

- Pour hot but not boiling water into a suitable container and place the candle upside down in it.
  Caution: If the water is too hot, the candle may melt.
- 2. After about 10 minutes, the candle should be soft enough. If the candle is still too hard, add more hot water and wait again.
- 3. When the candle is soft enough, you can roll it a little flat with a rolling pin or acrylic roller. Leave out the ends.
- 4. Take the flattened candle in both hands and turn it in the opposite direction to create the twist.
- 5. Check that the candle is straight. Then leave to cool.

## Decorate the candle holder:

- 1. Cut Décopatch paper, coat a candle holder with Patch Glue and place the paper. Brush over again with the glue.
- 2. Fix the eucalyptus leaves to the candle holder with

hot glue and attach a satin ribbon.

3. Finally, decorate the finished candles with candle liners.
