With just a few materials, you can create unique works of art that are sure to attract admiring glances. Let's dive into this exciting adventure together, step by step DIY-Adventure and discover how easy it is to create magical Easter accents with paper wire and folding paper .

easter decoration from Paper and wire: Creative DIY-Instructions

Prepare template

Start your project by downloading our free template online and printing it out. The template will serve as the basis for shaping your wire design. Don't underestimate this template; it's your roadmap to a successful craft.

Cut and twist the paper wire

Take a piece of paper wire and cut it to the right length. Paper wire is a particularly flexible material that is ideal for creative projects. Fold the wire in half and twist it by twisting the two halves together. This technique gives the wire

additional stability and makes it easier for you to shape it later.

Place the wire on the template
Now place the twisted wire on your template. Follow the lines of the template by bending the wire into the desired shapes. Don't worry if it doesn't look perfect the first time - you can adjust the wire again and again until it matches the lines of the template exactly.

Connect the ends of the wire
When the shape of the wire on the template is complete, twist the two ends together to complete the circle or shape. Make sure that the connection is stable so that your shape will hold during further processing.

Fix the wire with handicraft glue
Now apply a thin layer of handicraft glue along the wire construction. The handicraft glue will ensure that the wire sticks to the Paper during the next step.

Place the mold on folding paper
Carefully place the wire on a piece of folding paper. Press it lightly so that the glue holds the shape in place. Allow the glue to dry well to ensure that everything is firmly attached and that you do not lose any parts when cutting out.

Cutting out the motifs
Once the glue is completely dry, take a pair of scissors and cut out the motifs along the wire border. These precise cuts give your artwork a professional look and are the finishing touch to your Easter decorations.
Now you can decorate your wire figures, moss and other decorations on a tree disc and attach them with hot glue.

Congratulations, you've done it! Your homemade easter decoration made from Paper and wire is ready to brighten up your home. These unique, handmade decorations are also perfect as gifts or as eye-catchers at your next Easter brunch. If you are now in the mood for more creative projects, visit our online store and discover our extensive range of craft materials. Have fun crafting and happy Easter!
