With these instructions, you will learn how to paint, decorate and add atmospheric lighting to your building kit . Get the materials from our online store and let your creativity run wild!

Design creative wooden plug-in motifs with chain of light : A step-by-step guide

Step 1: Paint building kit

Start by painting the wood-building kit according to your wishes. Use the colors you like best to give your motif an individual look. Make sure that the paint is applied evenly and dries well before moving on to the next step.

Step 2: Design window and door frames

Once the basic motif has dried, you can design the window and door frames with a paint marker. Be careful with the marker to ensure that the lines are clean and accurate.

Step 3: Apply the message

Now comes the personal touch: write a message on the front pegboard of your wooden pegboard motif. Again, use the marker. for this Whether it's a welcome greeting, an inspiring quote or simply only a funny "hello" - your message will make the building kit even more special.

Step 4: Stick the motifs onto the rails

Once you have attached your message, stick the painted motifs into the rails provided. Use handicraft glue, to make sure everything sticks securely.

Step 5: Attach chain of light

Now comes the highlight: the chain of light. Use hot glue to attach the battery compartment to the back of the plug-in rail. Make sure it is firmly attached as it has to bear the weight of the batteries. Now carefully attach the chain of light along the motifs and into the rails. Make sure that the lights are evenly distributed and well fixed.

Now you are ready to proudly present your self-designed building kit ! You can find all the materials you need in our online store. Take a look and discover our extensive range of creative and craft items. Have fun crafting and designing!
