Glasplatte mit gravierten Ilex-Motiven

Instructions No. 422

Difficulty: Advanced

Working time: 45 Minutes

Glass engraving turns simple everyday objects into valuable unique pieces. With a little practice you can embellish the glass plate with beautiful Ilex motifs. A hobby with many facets that everyone can learn - crystal clear!

Here's how it works:

Download the motif template and fix it with crepe-Adhesive tape under the **glass plate** . Carve the contours with the **fine diamond pencil**.

The next step is to remove the motif template and attach **black Coloured paper** instead. In this way the fine incised lines become clearly visible

Now **work out** the areas as well as the leaf veins and structures with the **middle diamond pencil**. Within the areas for this, set fine lines close together and hatch them. Then smooth the hatchings with the grinding pencil so that an even shading is created. If necessary, tighten the edges again with the fine diamond pencil to create sharp contours.

Extra tip:
Clean the glass surface repeatedly with a piece of soft cloth or a paper towel in between: wipe the surface and

release from grinding dust. This way you can see exactly what you have already engraved

In the finished motif, individual areas with a white calligraphy Marker and thus particularly emphasize.
