Hanging Advent Wreath

Instructions No. 2612

Difficulty: Beginner

Working time: 4 Hours

Do you want your Advent wreath to be something special this year? Then how about a hanging Advent wreath? In our example, we decorated a metal ring with different coloured stars, some eucalyptus, a string of lights and spiral candles. The decoration was then hung up with ribbons.

Hanging Advent wreath simply decorated

Cut two approx. 30 cm long pieces from a round rod and paint them with white craft paint.

As soon as the paint has dried, glue the two rods crosswise into the hanging eyes of the metal ring using hot glue.

Wrap the fairy lights around the ring and glue the battery compartment under the round rods with hot glue. Make sure that the compartment can be opened.

For hanging, you need two pieces of the wire of the same length, the ends are wrapped around the ring. Take the wires together in the middle and knot them together.

Decorate the ring with eucalyptus. You can fix this with the wire as well as with hot glue.

Paint some stars with craft paint as desired. Decorate the large white star with hand lettering.

Attach wire to all the stars for hanging and decorate individual stars with eucalyptus leaves.

Finally, place the candles in the grommets.
