Illuminated star tray

Instructions No. 1033

This tray offers you the ideal basis for lovingly designing it at Christmas time. The festive Gold and the classic baubles decorate the wreath with christmassy elements. A highlight is the chain of lights with the acrylic stars. It does not give only a cosy atmosphere but unfolds a very special secret when the lights are switched on: the stars of the foil integrated there become visible..

And it is as simple as that:

Prime the star tray inside and the handle in Gold, the outer surface in Terracotta and the feet in Carmine Red. Let everything dry well.
Transfer the star shape of Acrylic Stars three times to the star foil and three times to Straw silk paper. Cut out the piece Straw silk paper roughly and stick it with Napkin varnish on a piece of star foil. When the glue has dried, cut out all six stars and place them in the Acrylic forms. Thread the light chain through the holes in the stars. Make sure that the light bulb is behind the foil side at Straw silk paper .
Decorate the Willow on the tray and place the star lights on it. Decorate your arrangement with Fir and globes. If possible, glue the balls only to their suspensions with the hot glue.
