Instructions for a Christmas wooden star

Instructions No. 745

Difficulty: Beginner

Working time: 30 Minutes

This wooden star offers you the most varied design possibilities: The "**starVBS with compartment" looks** wonderful as a wall decoration or as a door pendant - with the help of these instructions you can recreate our craft idea right away!

Here's **how it works**

Prime the star with the Paint sponge and the Wood stain. Let the star dry well

Now roughly cut out the outlines of the sides of the star tips from the **Decopatch- Paper**. Paint the wooden side directly with the patch glue and put the Decopatch-Paper on top. Use the Napkins-brush to smooth the motif. The brush helps you to avoid wrinkles and cracks when applying the Decopatch paper. Afterwards the applied Motif paper is painted over with patch varnish and thus sealed. After a few minutes, you can adjust the motif to the star shape: Just glide along the star's contour with a sharp scalpel.

Now use double-sided Adhesive tape to attach the **Lace ribbon** on the edge of the star. You can **apply** the buttons with hot glue.

Additional tip: Use the StazOn Ink Pads to give the star contour. Pull the cushion along the edges of the star. For charm, it may be a little irregular

Now **decorate the star's compartment** with winter and Christmas picks, add the felt girl and stick the decoration with hot glue. Take a button, stick it on the

middle of the Felt-hanger and decorate it as well. Fasten it with **hot glue** as well

Finally, pull the ribbon, shortened to the desired length, through the eyelet. Now your star is ready and you can put your eye-catcher in scene.
