Working time: 3 Hours

Creative Easter decoration with self-cast bunnies in a metal ring

Are you looking for a unique and impressive Easter decoration that is guaranteed to turn heads? With our detailed instructions for casting bunnies in a metal ring, you can create a beautiful decorative piece that shows off your crafting skills. Our step-by-step instructions show you how to conjure up a magical composition of casting compound, natural materials and lights using simple materials. Discover your creativity and give your home a touch of spring freshness and Easter spirit.

Step 1: Making the castings

Start by mixing about four tablespoons of casting powder with water to form a creamy mixture. Pour the mixture into a bunny mold and tap lightly against the mold to release any air bubbles that may have risen and to harden the casting compound evenly. Leave the mixture to dry for around 30 minutes. After Time to dry: you can carefully

remove the bunny caster from the mold and smooth the edges with sandpaper . For perfect strength, the casting should be left to dry for a further 12 hours.

Step 2: Stable stand on the birch slice

To create the basic structure of your decoration, glue two blocks parallel to each other with a little space between them on a birch slice. Make sure that the metal ring fits exactly between them. Allow the glue to dry completely to ensure stability.

Step 3: Decorate the metal ring

Cut pieces around eight centimetres long from a garland of leaves and pull a few flowers from the gypsophila. These will serve as enchanting accents for your wreath. Wrap the leaves and flowers around the metal ring with enameled copper wire. The wire provides stability and adds an elegant metallic sheen.

Step 4: Lighting for an atmospheric ambience

Create atmospheric lighting with an optional micro LED-chain of light . Carefully wrap the chain of light around the decorated metal ring. To discreetly hide the battery compartment, you can attach it to one of the blocks from behind using hot glue.

Step 5: Final decoration

Glue a small wreath of flowers to one of the bunnies and attach both bunny castings firmly to the birch slice using hot glue. Finally, you can glue Iceland moss and a few more flowers to the birch slice to emphasize the natural look of the arrangement.

Start your craft project today!

Turn your Easter decoration into a real eye-catcher and create bunny castings in a metal ring with our instructions to bring out your creative side. You can find all the materials you need in our online store. Start your DIY-Project and give your home a unique charm!
