lampshade from wooden staples

Instructions No. 2159

Difficulty: Advanced

Working time: 4 Hours

This unique DIY-Lamp is super easy to make and is a guaranteed eye-catcher. You can then hang different pieces of paper or small figures on the clips to make your lamp truly unique.

And this is how it is made:

To build the **lampshade** first place the **lamp ring** on the **plant bowl**. Now clamp **clips** to the ring once all the way around. Then attach an additional row of clips to the clips in the first row. In the third row, hot glue the handle of the clamps to the handle of the clamps in the second row so that you can open them to hang something on them.

The structure must now be carefully turned over. Place the **metal ring** in the lamp and fix the clamps to it with hot glue to create the classic lampshade-shape.

Last but not least, you can use the **motif punch** and the **printed Paper** and hang them on your new lamp.
