Light objects in glass

Instructions No. 1578

Difficulty: Beginner

Working time: 15 Minutes

Hanging light objects in glass are fascinating eye-catchers, which can be designed quickly by the user with little effort. The decorative lights are manufactured in a contemporary way with LED light chain with timer function. We have put together different designs for you here. Get inspired and make your own lights with glass, LED light chains and wire.

Hanging decorative glass "Terrarium

For the small glass, small butterflies were punched out of Paper with a Craft Punch and glued to a micro LED light chain. The Acrylic glass eggs are pasted with Straw silk paper

The terrarium decoration glasses are filled through the large opening first with the light chain. This is pulled together with the hanging cord through the glass opening from the head. The light chain can be wrapped around the Cord and will later let the light shine up to the suspension point. The Acrylic glass eggs and possibly further decorations will be filled in afterwards.

Bottle light party

Hanging bottles filled with micro-LED fairy lights are a great decorative highlight - indoors and outdoors.

Take the light chain and thread the individual lights into the bottle until the third last light is reached.

Close the bottle and attach the Jute ribbon to the bottle cap. Wrap the rest of the light chain around the Jute ribbon. and knot it at the end to form a hanging loop

The battery compartment can be glued to the Jute ribbon with hot glue or fixed with a knot

Creatively designed with color and more

Choose a colour and apply it to the bottle with Paint sponge or take a Adhesive tape and stick on the parts of the bottle that you do not want to paint

With the Adhesive tape you will get straight edges. But you can also punch out motifs from cardboard with a Craft Punch , stick them on the bottle, paint over them and remove them after drying.

The glass bottles are suitable for year-round decoration. According to your wishes, they can also be decorated with Napkins, transfer Paper, ribbons or other materials.

Luminous wire glass beads

For the glass spheres, the micro-LED light chain was wrapped with wire and formed. Alternatively, the complete ball is simply wrapped with drawn mesh. The light chain is guided through the small opening in the glass balls. Afterwards simply hang it up.

Must Have

VBS Glass bottles with swing top 2 pieces

Fill volume: 250 ml
Content: 2 pieces
Depth: 5 cm
Width: 5 cm
Height: 19.5 cm
Material: Glass
