Lighthouse with light

Instructions No. 1599

Difficulty: Advanced

Working time: 45 Minutes

This **lighthouse** leaves nothing to be desired - beautifully designed with light, **it lights up** your home! It is **easily recreated** with a little colour and maritime decoration.

First remove the inlays to make it easier to paint the lighthouse

Prime the wooden lighthouse **with white Handicraft paint**. After drying, decorate the lighthouse with navy blue and beige Handicraft paint and put the shelves back in place
If, like us, you want to paint stripes or other patterns, we recommend that you cover them with crepeAdhesive tapeover the dried white paint so that you have clean edges. This makes painting easier

The next step is to glue the battery compartment to the ceiling, so that it is not visible, but the lights can still be switched on easily. **Place** the rest of the **lights** in the lighthouse if you like.

Tip: If you glue the end of the fairy lights to the ceiling in the same way, the fairy lights can be decorated more easily and beautifully.

Last but not least, the lighthouse will be **embellished** with **maritime decoration**, such as scattered parts, Jute ribbon, shells and shell granules.

Must Have

VBS "Stormlight" wooden lighthouse

Length: 15 cm
Width: 15 cm
Height: 36 cm
Material: Wood

11,95 €
