Miniature winter landscape

Instructions No. 2932

Difficulty: Beginner

Working time: 2 Hours

Are you ready to experience the magical beauty of winter in miniature? In this craft tutorial, we'll create an enchanting miniature winter wonderland that will transport you to the frosty world of winter. With a few simple materials and a little creativity, you'll be creating a fascinating winter scene in no time.

First cut the **corrugated cardboard blank** to the desired size. We have opted for a circle with a diameter of 25 cm. This serves as the basis for the miniature winter landscape.

Coat the cardboard with **decorative snow**. As long as the snow is still slightly damp, the **miniatures** can be placed in it. This fixes the figures in place.

Finally, coat the transitions between the figures and the snow with more decorative snow. Leave everything to dry.
