Molded bowl with macramé-rim

Instructions No. 3441

Difficulty: Advanced

Working time: 2 Hours

Are you looking for a new and exciting idea for your next project? DIY-Project? Then these self-cast bowls with a perforated rim and macramé-edge are just the thing for you! These unique decorative pieces are not only only practical, but can also be designed in an amazingly versatile way. The finished pieces are perfect for your home or as handmade gifts for dear friends.

Step-by-step instructions for making coasters and bowls with a perforated rim

1. **Preparing the casting compound**

First, mix the casting powder with water to obtain a smooth, lump-free mixture. You will need about 7 tablespoons of casting powder for the silicone casting mold "coaster with perforated rim, while 9 tablespoons are required for the "bowl with perforated rim". Gradually add water and stir the mixture well until you have a creamy, lump-free mixture. Add colour concentrate to the mixture as desired.

2. **Pouring and drying**
Carefully pour the prepared mixture into the silicone molds. Make sure that the mixture is evenly distributed. Leave the molds to dry for about 4 hours until the shells are firm and stable enough to be carefully removed from the silicone mould . Then leave them further to air dry.3. Decorate the sides of the bowls Cut pieces of from paper wire about ten centimetres long and push them through the holes on the edge of the sides. Twist the wires together.

You now have the option of wrapping the jute ribbon or cotton cord around the wires using various techniques.

Whether you create the ribbons by wrapping weaving or loops around the wires, the possibilities are endless. This gives the bowls an individual and handmade look.

3. **Finishing touches with beads and labels**
To finish, you can glue a wooden bead to the ends of the wires or simply bend the wire inwards. Use the handmade label as a personal touch. You can attach it to the bowl using handicraft glue .

Have these instructions inspired you to create your own unique coaster and bowls? You can find all the materials you need here in our online store for creative and craft items. Order the necessary materials now and get started on your new creative project straight away.

HAND MADE

Must Have

Silicone casting mould "Bowl with perforated edge"

Fill volume: 250 ml
Number of parts: 2
Frost and heat resistant: -40 - 230 °C
Diameter (outside): 18 cm
Height: 6 cm
Material: Silicone

15,99 €
~~RRP 16,99 €~~
