rainbow-kandelaar

Instructions No. 3007

Difficulty: Beginner

Working time: 1 hour

Aren't the candlesticks in rainbow-form pretty? With the matching candles with beautiful motifs and sayings, they are a decorative highlight in your four walls and also ideal as gift idea . The candle holders are made using the trendy casting technique. And the highlight: the casting compound is now also available in black! The black candle holder complements the white stand perfectly.

Design a candle:

Stamp the **silk paper** with the **stamps** of your choice. Cut them out and place them right-side up on the **candle**. Place **baking paper** over it and hold it tightly together. Make sure that your stamped silk paper lies straight on the candle. Now carefully blow-dry over it with the **hot air dryer**. Then carefully peel off the baking paper.

Pour the rainbows:

Mix the **casting compound** with about **8 heaped tablespoons** and water until the mixture has a creamy consistency. Then pour the casting compound into the **casting mold**. After about **45 minutes**, you can carefully remove the casting from the mold. The white and black casting compound is mixed and processed in the same way. **Tip:** If you want to make black and white castings, start with the white Raysin so that the white casting does not contain any residue from the black casting powder. Always clean the casting molds well after demolding so that no residue remains and you can enjoy your casting mold for a long time to come.

Glue the **spout** into the hole and place the **candle**. To ensure that the candle sits firmly in the spout, place a **wax plate** in the spout beforehand.
