Rustikale Holzlaterne mit Brandmalerei

Instructions No. 277

In this manual we show you how you can easily decorate wooden articles with Wooden burning . Design a Wind light of your choice with pretty edelweiss and other patterns and make a simple wooden article a real unique piece.

It's that simple

Step 1)

First smooth the Wind light with Sandpaper and round off the corners. Fix the template with graphite paper and crepe-Adhesive tape and trace the contours with a ballpoint pen. Trace the transferred motifs with the fine tip of the firing station, then place small dots around the hearts.

Step 2)

Wipe diluted antique white and black Handicraft paint one after the other with a damp sponge over the surfaces and remove again and again with a dry cloth until the desired effect is achieved. After drying, design the flowers with white and yellow Handicraft paint . Finally, apply self-adhesive Masking Tape, over it add Ribbon to Satin ribbon and dab white dots between the burnt dots around the hearts.

Step 1) Trace contours with the fine tip of the firing station.

Step 2) Apply Handicraft paint with a fine sponge.

This idea is timelessly beautiful!

Some Article are unfortunately no longer available

But this idea is too good to withhold from you. We would be happy to continue to present it to you - let yourself be inspired!
