Santa's footprints

Instructions No. 2050

Difficulty: Beginner

Working time: 30 Minutes

HO HO HO, who's been stomping around the apartment?
Well, if it wasn't Santa Claus leaving snowy footprints. This funny and original decoration idea is very simple and can be created in a few easy steps and will fascinate your visitors and children.

This is how the footprints are designed:

Print out the **template** and transfer it 2 times on Then Craft cardboard sheet. cut **out** the footprints so that there is always a left and a right shoe print

Spray your self-created one with spray Stencil glue **and** place it on the wind turbine film**.** Spray over it again with spray glue and place the wooden letters **so** that the words "HO HO HO HO" are one below the other. Now sprinkle the **diamond snow** on the foil. Press it slightly. After approx. 2 minutes remove the letters Stencil, and the letters. Catch the excess diamond snow in a bowl. You can repeat this procedure as often as you need shoe prints

Cut out the dried shoe prints from the wind turbine film. You can now lay it on the floor or stick it to the wall or window, so that it looks like Santa Claus has stomped through your apartment

For orientation: On a windmill foil with the measurements 70x50 you get 6 footprints (3 pairs) and use about 1/2 bag of diamond snow.

Must Have

Diamond snow

Weight: 100 g
Material: Plastic

3,29 € (1 kg = 32,90 €)
