Scandinavian-style fir wreath

Instructions No. 936

The Scandinavian colours are becoming increasingly popular. What could be better than to give a traditional Advent wreath a modern design? Make your Advent arrangement and enjoy the pre-Christmas time.

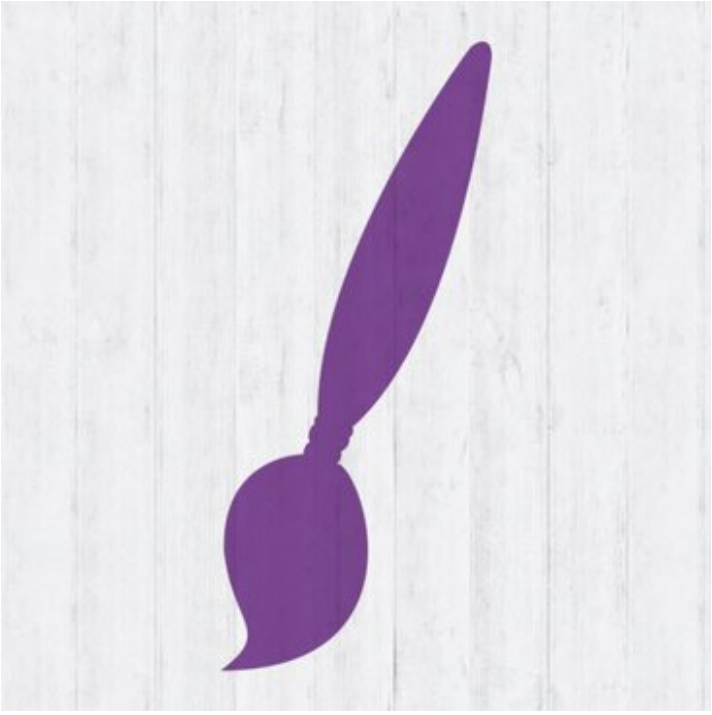

And it's as simple as that

Cut the wire into small pieces, heat it over a candle and put three in the bottom of each candle. Then put the four candles into the wreath. Stick the Polystyrene balls on the wooden sticks and dab them with decorative snow. After drying, shorten the sticks, place them in the wreath and fix them with hot glue. Tie the stars in the wreath, make small loops of checked ribbon, which you place on the candles and loop some loose checked ribbon around the wreath. Finally, you can paint a little Decorative snow on the wreath and let it dry

This idea is timelessly beautiful!
