

# school gift bag Parrot

Instructions No. 3305

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 6 Hours

A **home-made school cone** is the perfect companion for the first day of school! Not only does it attract everyone's attention, it is also a unique personalized item. With our simple instructions and the corresponding materials from our online store, you can become a DIY-Professional. Discover how you can give free rein to your creativity and design the school cone with bright colors and playful details to give your child a special treat.

## Design your perfect school gift bag as a colorful eye-catcher

### Step 1: Preparing the base

Start by gluing the silk paper with the VBS handicraft glue to the inside of the school cone. Make sure that the Paper is evenly distributed to create a smooth surface. Let the glue dry well. Then you can stick the school cone together. Add some handicraft glue to the joint to ensure a secure hold.

### Step 2: Add personality foam sheets

Download our free templates and print them out. Cut out the templates and transfer them to the foam sheets with the sublimation pen. Don't worry, the purple ink of the pen will disappear by itself. You are completely free with the colors - choose the ones you like best.

### Step 3: Decorate with feathers

Take the cut-out tail feathers (template A) and glue the ends together with hot glue. Attach them to your school cone to create a feathery design. Repeat the process with the side feathers (template B) and give the school cone an extra dimension.

### Step 4: Eyes and beak create life

For the eyes, cut out two circles (template C) and attach the wobbly eyes "Maxi" to them. They give your design a playful touch. Now the beak is missing: use the larger beak (template D) and apply hot glue to the edge of the foam rubber. Bend it carefully and press it firmly onto the school cone. Repeat the same process for the lower beak (template E).

#### **Step 5: Personal note with name**

For a personal touch, cut out two additional feathers and label them with the name of the future schoolchild. Glue them on top of each other with hot glue. Use a hole punch to make a hole and pull the cotton cord through it. A knot at the end holds everything securely together.

#### **Step 6: Final filling and closure**

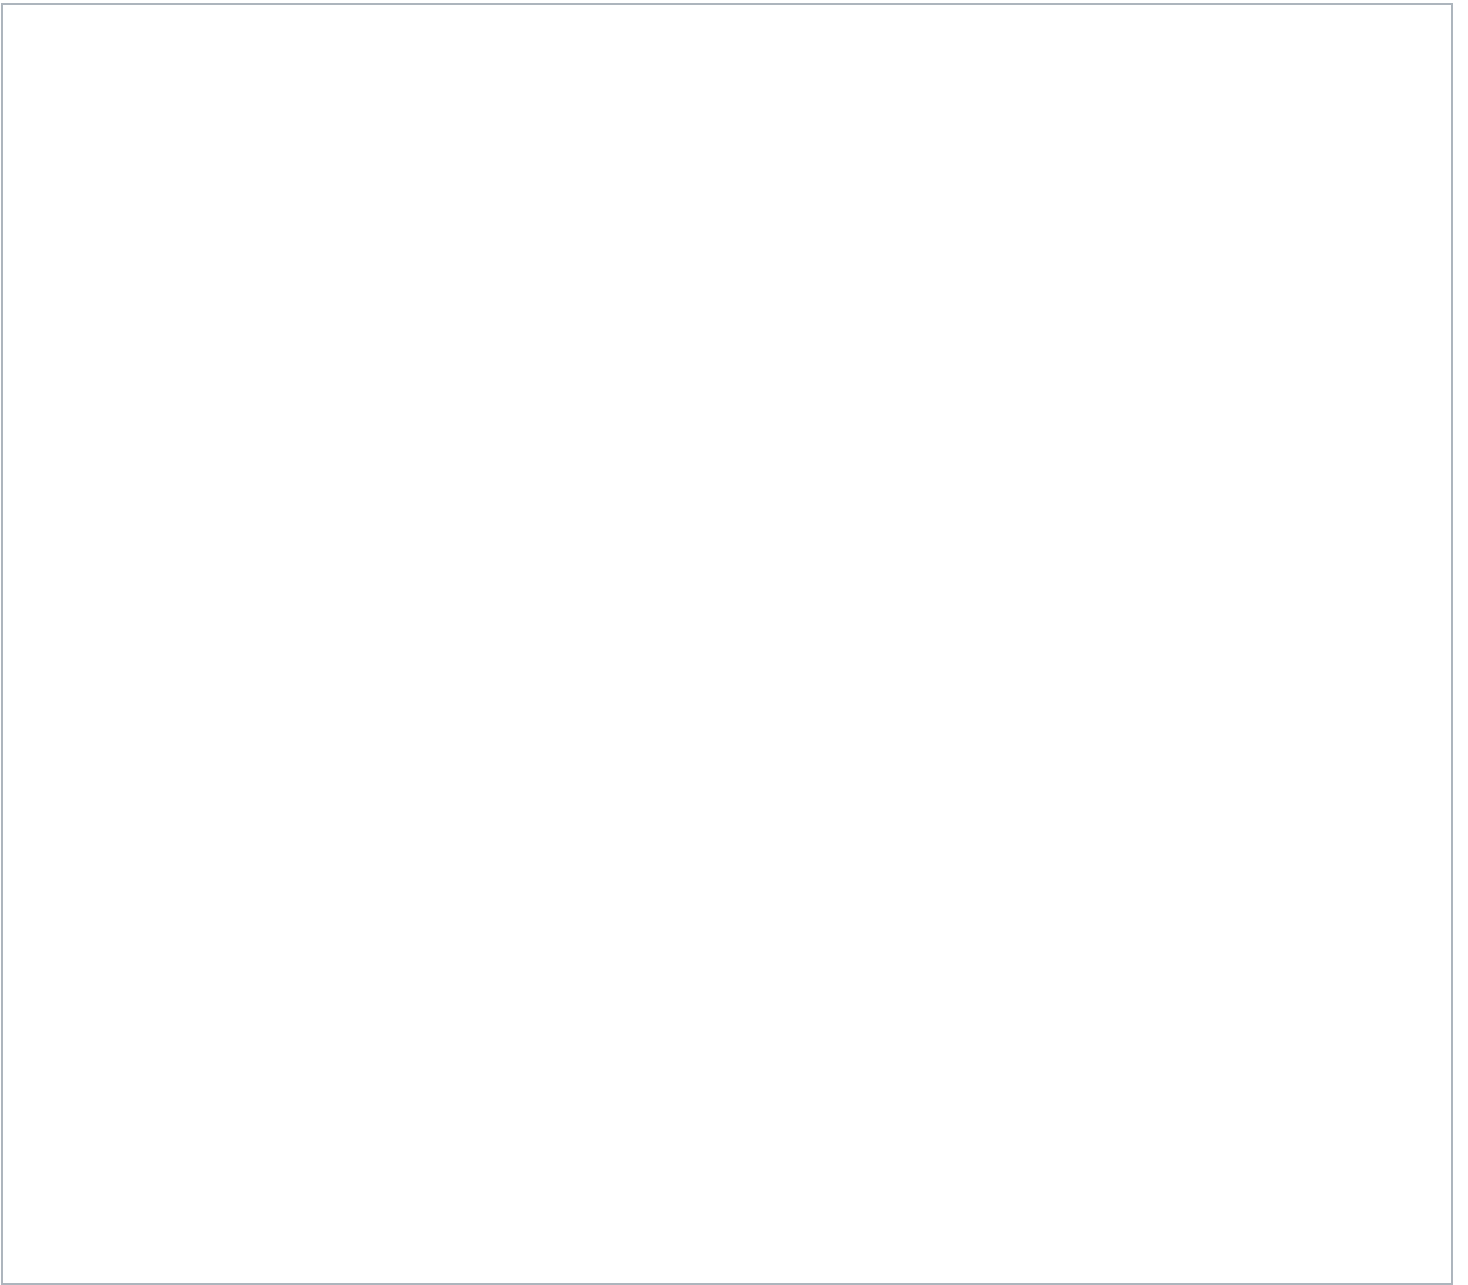

Now fill the school cone with little surprises and close it carefully with the cotton cord. Make sure that everything is well stowed away so that the contents remain safe during transportation.

#### **Discover our range now**

With this original school cone, the first day of school will be an unforgettable experience! Stock up on all the materials you need in our online store now and bring your creative project to life. Visit our website and be inspired by the variety. Have fun crafting!
