Stained glass on glass plate and glass bottle

Instructions No. 1498

Difficulty: Beginner

Working time: 30 Minutes

Painting on glass is not only particularly much fun - the material enables optics that are possible only with the transparency of glass.

Fascination glass painting

Glass paints are highly brilliant transparent flowing colours. In order for them to adhere well to the glass, it is important that the glass is cleaned of grease and dust beforehand.

To paint coloured areas, contour paint is first applied **as a demarcation** . As soon as it has dried, the paint can be painted on the surface.

Tiffany look

Many people love to paint glass colorfully in Tiffany style. This is very simple: instead of the usual contour colour, a pasty relief paste is **used.** This gives a great effect.

Frost effect

For this, instead of the normal Glass and porcelain paint **VBS Frost Effect paint** is used. Frost optic is especially suitable for winter and Christmas decorations: Ice crystals and frost optics.

Painting behind glass

For glass bowls, paint the underside. The template is placed under the glass in mirror image. The colourful design shines nobly through the glass in the finished object. The unpainted glass surface can be cleaned as usual and also filled with food.

Motif template

The motif template for our illustrated decoration example can be downloaded: simply click on Download motif template.

Must Have

VBS Glass plate "Rectangular", 26,5 x 12 cm

Length: 26.5 cm
Width: 12 cm
