Stylish Pendants from Jewellery Concrete

Instructions No. 1568

Difficulty: Beginner

Working time: 20 Minutes

You can cast your own pendants very quickly. Discover here how easy it is to do this and be inspired by the many different designs.

Pendants cast

Stir the decorative concrete according to the product instructions

Pour the mass into the pendant form

The casting compound can be removed from the mould after about half a day. Correctly hardened and thus robust enough for further processing, the cast jewelry pendant is ready after about 24 hours.

Casting compound touch,..

... ...just pour it into the mold and...

. .Pendants take from

Individual design

Not only the different casting moulds allow to **design** pendants very **personal.** Paint the pendants with Metallic Paint, with chalky paint or glue a part of the pendant with wood veneer or cork.

The hole for the pendant, which is cast at the same time, can be easily fitted with a **leather strap or** a metal chain and a small metal accssoire can be tied in **front of the** concrete pendant according to your personal taste.

Must Have

Jewellery Concrete

Weight: 300 g

5,69 € (1 kg = 18,97 €)
