

# Styrofoam ring vase

Instructions No. 2723

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 4 Hours

When modelling, beautiful and also practical things can be formed with the hands. This vase was also made from concrete modelling clay. In this tutorial, we explain how you too can create the decorative vase.

## Designing the vase

First cut a piece off one side of the polystyrene ring using a polystyrene cutter or a cutter to create a base.

On the opposite upper side, use a cutter to cut a depression into which a tea light jar is glued.

Now paint the entire surface with gesso. This will help the modelling clay to adhere better to the surface later. Allow to dry completely.

Have a small bowl of water ready for modelling.
