

Tablett im Landhaus-Stil

Instructions No. 1005

This tray is a true all-rounder. With its handle it cannot be used only one-handed as a classic tray, it also offers various design possibilities. So you can put it wonderfully in scene with candles, vases or figures. Decorate it again and again to your heart's content, the simplicity of the tray is more changeable than ever.

It's as simple as that:

Prime the tray with a sponge in white. Wipe lightly over the metal trimming to achieve the desired shabby chic look. If you like, you can add a few more spots with a little sandpaper when dry and thus set accents. Then seal everything with the Clear varnish.
