Teelichthalter aus Holz im Winter-Design

Instructions No. 927

Do you still need a quick, winter decoration for your table or sideboard? This Tealight holders in a wintery design is easy to create and offers you the possibility to temporarily transform yourself into an advent arrangement with fir branches, stars, balls and much more.

And it's as simple as that:

Prime the wood-Tealight holders in white. When the paint is dry, wipe the grey paint over the surfaces with the Paint sponge and let it dry.
Now apply the decorative snow with the Spatula on the Tealight holders and the tea light glasses. Place the figures in the still wet decoration snow and let everything dry well.

The tealights in the LED technology look deceptively real with the greatest possible safety aspect.
