Tissue paper fairies

Instructions No. 1757

Difficulty: Beginner

Working time: 30 Minutes

Let **filigree fairies** float - very lightly crafted from **Silk paper**. Ideally suited to embellish your windows, bouquets and much more. With little material and light handles these enchanting creatures have been created.

It's so easy for you to make fairies:

Cut the **Silk paper** in the desired colours and the desired shape. With our flower fairies we have cut this in the Silk paper form of petals. Make sure that you leave the upper Lace ones very long. Fold them up and twist the tops of Lace the leaves.

Then form with **Florist tape** a waist and arms. To do this, wrap the upper folded Lace leaves with The arms Florist tape. are placed at the top of the waist and turned in. For the hands, leave the hands in their Florist tape original position and turn the lower one back Florist tape in. Leave enough room above the waist for the head and a hat. Paint the **wooden bead** as you like and put it as a head on the flower.

Finally, form another Silk paper hat and glue it on the head.

Now you just have to knot only a thread on the stem and you can decoratively stage your flower fairy.
