VBS Craft Kit: "Wooden Star to Hang"

Instructions No. 3689

Difficulty: Beginner

Working time: 30 Minutes

With this craft kit, you can create a **decorative wooden star** step by step. The combination of natural materials and creative work makes for a wonderful crafting experience. The finished star is perfect for the Christmas season as a hanging decoration—for example, on a window or wall. We hope you enjoy making it.

In addition to the materials included in the kit, you'll also need a few things to complete the project: handicraft glue.

Here's how to make the star:

First, set up your workspace and sort all the wooden discs by size. This way, you'll always have the right pieces on hand as you continue, and you can work neatly and quickly. Next, take one of the smallest tree discs and pour some handicraft glue into the opening provided. Now take a round wooden rod and slide the small disc onto one end. Next, slide the medium-sized disc onto the same rod, followed by the large wooden disc. Repeat this step with the remaining five wooden rods until you have a total of six evenly assembled rods with wooden discs .

In the next step, apply " handicraft glue " to all the openings of the wooden star. Place the star flat on a level surface, such as a table, and carefully insert the prepared sticks into the designated holes. Make sure all the sticks are straight. Then let the piece dry completely so it becomes sturdy.

Finally, screw the metal eyelet into the center of the edge of one of the smallest " wooden discs ." Make sure it's straight and secure. Now thread the " jute ribbon " through the eyelet and carefully tie the ends together. Your wooden disc star is now complete and ready to be hung.

Creative Design Idea

If you like, you can further customize the wooden disc star, for example with wooden burning or with handicraft paint. This creates a truly unique, personalized piece.
