VBS Creative set "Felt-Ladybird"

Instructions No. 1720

Difficulty: Beginner

Working time: 45 Minutes

With our **Creative set** make a cute little companion for your home. The set contains everything you need to make the **ladybird**. You will also only need scissors and since Handicraft glue. the beetle is very easy to make, it is also perfect for handicrafts **with children**.

This is how you make the ladybird:

Print out the **templates**, cut them out and glue them together at the marked places. Now transfer the motif template twice onto the Felt. pencil. A soft pencil or a line-ex pencil**, in** which the lines disappear later, is ideal for this purpose. For the skin-coloured Felt one, transfer the only lower part of the body to the dotted line. Cut out everything with sharp scissors.

Now glue the individual parts together using **hot glue as** follows: First glue the cut-out part made of skin-coloured felt to the lower part of the body. Then place the red wings, dots and eyes in the desired position and glue them on. For the feelers, shape the and place Chenille wire them on the head. Glue the cap on the head and fix the feelers

Finally, apply hot glue to the edges of the two ladybird halves. Save a small part at the bottom of the beetle. Now glue the two halves together. Put them on the **wooden stand.**
