window decoration with houses in the metal ring

Instructions No. 3107

Difficulty: Beginner

Working time: 2 Hours 30 Minutes

This decorative ring is a real eye-catcher! You can hang it in the window. But the Christmas metal ring also looks very elegant on a wall or door. You can also create a matching Christmas wood building kit in the same style as a table decoration. Be inspired by our DIY idea here.

The basis for the window decoration is a black metal ring, Ø 30 cm. The decorative house front is already permanently installed, and a hanging loop guarantees that everything will hang perfectly.

Match the look of the wooden construction kit to the decorative ring: Paint the roofs of the houses with a black marker. You can also highlight the windows, doors and stars with black .

Use the bouillon effect wire to attach the conifer branches to the metal ring. Decorate it additionally on one side with satin ribbons and jingles. tie a hanging ribbon to the eyelet of the metal ring - and your new window decoration is ready.

The VBS wood building kit "Christmas houses with fir trees" is 12parts. First paint all the wooden parts with the black marker. and then simply stick everything together. Coat the joints with a little glue. This will keep the house decorations firmly together.
