Window pictures with Window Color

Instructions No. 1394

Difficulty: Beginner

Working time: 30 Minutes

Bring colour to your window! The cheerful **Windowcolor** Motifs are **very easy** to paint. They stick well and can be removed later.

Painting with Windowcolor

Download the motif template and print it out. Simply slide the printed sheet into a brochure sleeve and paint on the foil with Windowcolor colour directly from the liner bottle.

After the paint has dried, the finished motif can be peeled off the foil and attached to the window.

Extra tip
Windowcolor Paint contains even dried still moist molecules. Therefore it retains its typical smooth consistency even when dried. The motif on the window will dry out more and more with time, thus becoming brittle and not so easy to remove after months. We therefore recommend to simply replace the motif after approx. 3 months with a new Windowcolor picture.
