Winter village from corrugated board

Instructions No. 1808

Difficulty: Beginner

Working time: 45 Minutes

An impressive decoration, which nevertheless radiates a slightly rustic charm. With a few materials and a few hand movements, the small winter village is made and can be decorated on the windowsill or a chest of drawers with a little diamond snow.

Download the free **motif template**, print it out and transfer the fir trees and house fronts to the **Corrugated board**. Cut it all out. Tip: You can carefully **cut out** the windows and doors of the houses with **aCutter** knife or scalpel. It is best to place a **Cutting mat** under the Corrugated board.

With some **paint** you can add some colour accents if necessary. Now plug the firs into each other. To connect the house fronts, take a piece of the remaining one Corrugated board and remove the first **layer of paper**. Cut **strips** about 6 mm wide and fold them once in the middle. Now glue the strips with a little **Handicraft glue** from the back from top to bottom as a connection between the houses

Finally, a mini **LED light chain** is glued to the front of the house **from** behind with some hot glue.

Must Have

Corrugated board blank, 2-flute

Length: 60 cm
Width: 38 cm
Thickness: 6.5 mm
Material: Cardboard

2,59 € (1 m2 = 11,36 €)
